

RESOLUTION OIV/OENO 145/2009

TREATMENT WITH SILVER CHLORIDE

THE GENERAL ASSEMBLY,

Considering Article 2 paragraph 2 ii of the Agreement of 3 April 2001 establishing the International Organisation of Vine and Wine,

Considering the work of the « International Code of Oenological Practices » experts group,

Considering the favourable opinion issued by the "Food safety" group at its 14th session,

DECIDES: Upon the proposal of Commission II « Oenology » to introduce in the aforementioned « International Code of Oenological Practices », the following oenological practices and treatments:

DECIDES to update the relevant OIV document with the maximal residue level of silver in wine

PART II

Chapter 3: « Wines »

Treatment with silver chloride

Definition:

Addition of silver chloride to wine

Objective:

To reduce odour defects due to hydrogen sulphide and some mercaptans.

Prescriptions

- a) The dose used must not be over 1 g/hl
- b) The silver chloride must be previously applied to an inert support, like kieselguhr (diatomaceous earth) or kaolin
- c) The main operation must be preceded by trials to determine the amount of product to add.
- d) The precipitate must be eliminated by any appropriate physical procedure
- e) Residues must be treated by specialised sector
- f) Treated wine must be analysed to insure that the maximal residue level do not exceed 0.1 mg/L in silver
- g) The treatment must be carried out under the responsibility of an oenologist or a specialised technician
- h) Silver chloride must comply with the provisions of the International Oenological Codex

Recommendation of the OIV:

Admitted.
