

2. MUSTS

2.1.11 FILTRATION (16/70)

Definition :

Physical process by which must is passed through appropriate filters that retain particles in suspension.

Objective :

Clarification of the must.

Prescriptions :

- a) Filtration is practised with or without additives.
- b) Additives used, such as diatomaceous earth and cellulose paste and powder, shall comply with the prescriptions of the *International Oenological Codex*

Recommendation of OIV:

Refer to the practices and treatments mentioned above.
