

3. WINES

3.3.12 CALCIUM TARTRATE TREATMENT (OENO 8/97)

Definition:

Addition of calcium tartrate to wine.

Objective:

to contribute to the tartaric stabilisation of wine by decreasing the content of potassium hydrogenotartrate and calcium tartrate.

Prescriptions:

- a) The dose used must be inferior to 200g/hl.
- b) The treatment is carried out by calcium tartrate addition, stirring and artificial cooling of the wine followed by the separation with crystals formed by physical means.
- c) Calcium tartrate must conform to the prescriptions of the *International oenological codex*.

Recommendation of the OIV:

Accepted.
