

II.2.3.4 Treatment with yeast ghosts

Classification :

- Yeast hulls: processing aid

Definition :

Addition to the must, to the fermenting must or to the wine of a preparation of yeast ghosts.

Objectives :

- a) To prevent sticking of the alcoholic fermentation
- b) To facilitate the completion of slow fermentations.
- c) To treat “stuck” fermentations.

Prescriptions :

- a) Yeast ghosts are added before or at the start of fermentation for objective (a); at the end of the fermentation for objective (b); before the yeast inoculation for objective (c).
- b) The doses used shall not be greater than 40 g/hl.
- c) The yeast ghosts shall comply with the prescriptions of the International Oenological Codex
