

### **II.3.2.2.1 Filtration by continuous deposition**

**Definition :**

Filtration of the wine, after formation of a filter bed, which is then fed constantly by a continuous addition of filter material into the wine to be clarified.

**Objective :**

To obtain a suitable level of clarity, to a given technological stage, by the elimination of substances in suspension in the wine.

**Prescriptions :**

- a) The nature of the filter material (such as diatomaceous earth, perlite and cellulose) and the necessary dose are determined by the turbidity of the wine and the clarification sought.
- b) The filter materials used shall comply with the prescriptions of the International Oenological Codex.

**Recommendation of OIV:**
