## INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

Treatment of wines with yeast mannoproteins

# **II.3.3.13 Treatment of wines with yeast mannoproteins**

## Classification:

• Yeast mannoproteins: additive

## Definition:

Treatment of wines by using mannoproteins from yeast wall degradation.

## **Objective:**

Improve stability of wine only with regards to tartaric salts and/or its proteins in the case of white or rosé wines

## Prescriptions:

- a) The doses that should be used will be established by the person in charge of the treatment;
- b) for certain young red and rosé wines the person in charge of the treatment should consider a pre-treatment using yeast cell walls if the mannoproteins alone do not present the sought after efficiency;
- c) Mannoproteins must comply with the provisions of the International Oenological Codex.

## Recommendation of OIV:
