INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

Treatment with sorbic acid

II.3.4.5 Treatment with sorbic acid

Classification:

• Sorbic acid: Additive

Definition:

Addition to wine of sorbic acid or potassium sorbate.

Objectives:

- a) See II.3.4.2 'Biological stabilisation'
- b) To prevent the re-fermentation of wines containing fermentable sugars.
- c) To prevent the development of undesirable yeasts.

Prescriptions:

- a) The addition should take place only a shortly before bottling.
- b) The dose used shall not exceed 200 mg/l expressed as sorbic acid.
- c) The sorbic acid and potassium sorbate shall comply with the prescriptions of the International Oenological Codex

Recommendation of the OIV:
