## INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

# Secondary fermentation

# **II.4.1.9 Secondary fermentation**

#### **Definition:**

Alcoholic fermentation in hermetically closed containers.

### Objective:

To produce sparkling wine by saturation under pressure with endogenous carbon dioxide.

### Prescriptions:

This operation takes place:

- a) By the alcoholic fermentation:
  - Either of a partially fermented must, or
  - Of a cuvee or a base wine with added grape must, concentrated must, grape sugar or sucrose.
- b) In the bottle, or
  - In other pressure-resistant containers (closed tank method):
  - Whether by the bulk discontinuous method, or
  - By the continuous method.
