

## **II.2.1.6 Gelatin treatment**

### **Classification**

- Gelatin: processing aid

### **Definition:**

Addition of gelatin to the must

### **Objectives:**

- a) Reduction of polyphenolic compounds in the must, in order to decrease must astringency before fermentation.
- b) Reduction of the particles which are insoluble in the must.

### **Prescription:**

This gelatin must conform to the prescriptions of the International oenological codex.

### **Recommendation of the OIV:**

Admitted
