## INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

## Treatment with yeast ghosts

# **II.2.3.4 Treatment with yeast ghosts**

#### Classification:

• Yeast hulls: processing aid

#### Definition:

Addition to the must, to the fermenting must or to the wine of a preparation of yeast ghosts.

### Objectives:

- a) To prevent sticking of the alcoholic fermentation
- b) To facilitate the completion of slow fermentations.
- c) To treat "stuck" fermentations.

## **Prescriptions:**

- a) Yeast ghosts are added before or at the start of fermentation for objective (a); at the end of the fermentation for objective (b); before the yeast inoculation for objective (c).
- b) The doses used shall not be greater than 40 g/hl.
- c) The yeast ghosts shall comply with the prescriptions of the International Oenological Codex

#### Recommendation:
