I.4.8 Wine with an alcohol content modified by dealcoholization

Wine with an alcohol content modified by dealcoholisation is a beverage:

- obtained exclusively from wine or special wine as described in the *International Code of Oenological Practices*,
- which has undergone a dealcoholisation treatment in accordance with *the International Code of Oenological Practices* that has reduced the initial actual alcohol content by volume of the wine or special wine by a proportion of more than 20%,
- and which has an actual alcohol content equal to or greater than the relevant minimum actual alcohol content for wine or special wine specified in the *International Code of Oenological Practices*.
