# INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

## Microbiological acidification

# **II.2.1.3.1.2** Microbiological acidification

#### Definition:

Increase of titratable acidity and real acidity (decrease in pH) by using yeasts.

### Objective:

a) see general sheet "acidification" (II.2.1.3.1)

### Prescriptions:

In order to achieve this objective, microbiological acidification by yeasts may be carried out by inoculation of selected strains.

#### Recommendation of the OIV.:

See sheet: acidification by yeasts (Saccharomyces and non-Saccharomyces)( *II.2.1.3.1.2.1*)
