INTERNATIONAL CODE OF OENOLOGICAL PRACTICES Riddling

II.4.2.4 Riddling

Definition:

Sum of the operations designed to gather the deposit formed during the secondary fermentation on the closure of the bottle.

Objective:

To allow the elimination of the deposit by disgorging.

Prescriptions:

- a) Avoid all re-suspension of the deposit.
- b) This operation can be undertaken manually or mechanically.

Recommendation of the OIV:

Admitted
