## INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

# Treatment with ascorbic acid

# **II.1.11 Treatment with ascorbic acid**

#### Classification:

• Ascorbic acid: additive

• Erythorbic acid: additive

#### Definition:

Addition of ascorbic acid to grapes.

### Objective:

Protect the aromatic substances of the grape, through the antioxidant properties of the product, against the influence of oxygen in the air.

### **Prescriptions:**

- a) It is recommended to add ascorbic acid before the grape's crushing,
- b) The dose used must not exceed 250 mg/kg,
- c) It is advisable to use ascorbic acid with sulfur dioxide.
- d) The ascorbic acid must comply with the prescriptions of the International Oenological Codex.

#### Recommendation of OIV:

Admitted
