

### **II.2.2.3 Preservation by addition of carbon dioxide to must or carbonation of must**

**Definition:**

Addition of carbon dioxide under pressure to must, so as to hinder its fermentation.

**Objectives :**

- a) Preservation of must destined for the manufacture of juice.
- b) Slowing or stopping fermentation without other intervention.

**Prescription :**

The gas used shall comply with the prescriptions of the International Oenological Codex.

**Recommendation of OIV:**

Admitted
