INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

Preservation by addition of carbon dioxide to must or carbonation of musts

II.2.2.3 Preservation by addition of carbon dioxide to must or carbonation of must

Definition:

Addition of carbon dioxide under pressure to must, so as to hinder its fermentation.

Objectives:

- a) Preservation of must destined for the manufacture of juice.
- b) Slowing or stopping fermentation without other intervention.

Prescription:

The gas used shall comply with the prescriptions of the International Oenological Codex.

Recommendation of OIV:

Admitted
