## INTERNATIONAL CODE OF OENOLOGICAL PRACTICES

# Treatment with thiamin

# II.2.3.3 Treatment with thiamin

#### Classification:

• Thiamine hydrochloride: processing aid

#### Definition:

Addition of thiamin to must.

## Objectives:

- a) To accelerate the alcoholic fermentation.
- b) To reduce the formation, during the alcoholic fermentation, of substances capable of combining with sulphur dioxide and also to allow a reduction in the dose.

## **Prescriptions:**

- a) According to experiments conducted to date, a dose of 60 mg/hl proves sufficient.
- b) The product shall comply with the prescriptions of the International Oenological Codex.

#### Recommendation of the OIV:
